

Founded in 1989, Nova West Laboratory Ltd. has built a trusted reputation for providing high-quality food & water testing throughout Southwest Nova Scotia. Over the years, we've expanded to include three specialized divisions: Microbiology, Environmental, and Chemistry, enabling us to offer comprehensive testing services for food, water, wastewater, animal feed, fish meal, & retail beverages, serving clients across Canada.

Nova West Lab is an ISO/IEC 17025:2017-accredited analytical laboratory, recognized by the Canadian Association for Laboratory Accreditation (CALA)¹. This prestigious accreditation ensures our lab operates with technical competence & maintains a commitment to continual improvement. This assures clients of the accuracy & integrity of test results. As a locally owned & operated accredited lab in Southwest Nova Scotia, we have become a trusted partner for local industries, committed to quick turn-around times & reliable service.

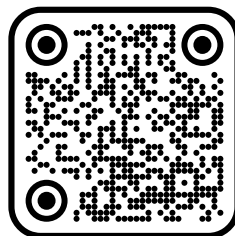

For more info on our pricing, scope of accreditation, or regulatory guidelines² that are applied on our Certificate of Analysis, please visit our website.

¹ Canadian Association for Laboratory Accreditation (CALA) is an internationally recognized leader in providing the highest-quality accreditation of laboratories. All CALA services are designed and delivered to inspire excellence in laboratories; to promote a better understanding of laboratory test results by laboratory clients; & to earn the confidence of Regulators.

² Certificate of Analysis provided to our clients can be applied with specific guidelines. The following guidelines & regulatory agencies associated to our documentation include; Canadian Drinking Water Guidelines, Fur Industry Regulations, Canadian Food Inspection Agency (CFIA), Moisture Standard on Scallops (Canada), & Moisture Standard based on a moisture/protein ratio on Scallops (France)
