2024 Price List

NOVA WEST LABORATORY Ltd. began in 1989 as a small quality control laboratory, testing food products for basic nutritional and bacterial information. In 2002, Nova West Laboratory was incorporated and started accepting samples from other private companies and the general public. Today, Nova West Laboratory has greatly expanded its capabilities to analyze different food, soil and water matrixes for many various tests. Clients use Nova West Laboratory's services to ensure compliance with governmental regulations related to the Canadian Food Inspection Agency and the Nova Scotia Department of the Environment as well as to verify their quality specifications and that of their customers. Nova West Laboratory continually strives to provide timely, efficient and accurate analytical services for our customers. We take pride in the fact that this dedication has led us to be the foremost analytical laboratory in Southwestern Nova Scotia. Nova West Laboratory is in good standing with ISO 17025 standards and is also audited on a regular basis by the Canadian Association for Laboratory Accreditation. [visit <http://www.cala.ca/scopes/3225.pdf> to view the current Scope of Accreditation]

Available tests include but are not limited to:

- Microbiological - Presence and/or enumeration of **coliforms, E. coli, staphylococci, aerobic plate count, yeasts and moulds, Listeria, Salmonella, and Vibrio.**
- Environmental - Chemical and physical parameters such as **Heavy Metals, Minerals, Biological Oxygen Demand, Total Suspended Solids** on water and wastewater samples.
- Chemical - **Salt, Ash, Fat, Protein, Water Activity, Moisture content** and **Titrateable Acid** determinations on various food/feed products.

Samples should be delivered to the lab Mondays through Fridays, between the hours of 8 a.m. to 4 p.m. Water samples are not accepted on the day before a holiday and food/feed samples for bacterial testing may not be started if results would be expected during the weekend. Samples delivered to the laboratory requiring "rushed results" will be subject to higher fees.
